Ultrasound Limitation Acknowledgement

Prenatal Ultrasound is a screening tool to help your doctor or care provider evaluate pregnancy viability, location (intrauterine or ectopic), position, fetal (gestational) age and an anatomical survey.

An assessment of fetal organs, the placenta, uterus and adnexa is routinely performed.

There are scanning limitations with **ALL** first, second and/or third trimester obstetrical ultrasound exams. Some of these limitations are affected by maternal body habitus, gestational age, fetal position and other limiting factors.

OBSTETRICAL ULTRASOUND CANNOT DETECT ALL FETAL OR CHROMOSOMAL ABNORMALITIES.

By signing this form, you are acknowledging that you have read this form and understand these limitations.
